

CPE Annual Index, Vol. 52, 1971

Subject Index

(HTS denotes Heat Transfer Survey, 1971)

ABSORBING with peat (Oct.) 5

Acrolein (Oct.) 7

Acrylic glass material (Mar.) 72

Activation:

of cassiterite for concentration by froth flotation

(April) 63

sonic, of powders (April) 59

Active carbon:

from textile wastes (July) 5

manufacture and uses of (May) 61

Advances in monomer production (*Conference Report*) (Mar.) 75

Air:

pollution from aluminium smelters (June) 49

separation, large-scale (Aug.) 5

Alloys for nitric acid plant, Fe-Ni-Cr (April) 51

Aluminium:

powder, processing (June) 5

smelters, air pollution from (June) 49

smelter, UK's first big (June) 7

Ammonia:

horizontal converter (Nov.) 5

oxidation catalysts, inactivation of (May) 5

plant feedstock, heavy fuel oil as (Nov.) 59

storage pressure spheres, design of (Feb.) 39

Ammonium:

carbamate, pumps for (May) 57

polyphosphate process, new (Aug.) 53

Anti-pollution controls, oil refiners prepare for (Mar.) 63

Automatic:

fertiliser granulation control (Jan.) 7

refuse disposal plant (June) 95

BAFFLE-ring centrifuge for dewatering plastic pellets, use of (Nov.) 53

Ball blankets, protecting cryogenic liquids with (Feb.) 54

Batch distillation, optimum reflux policies for (May) 47

Benzene (Jan.) 11

Boiler control by mass flow computer (Oct.) 57

CALCINATION plant, specifying (Mar.) 59

Calculating heat transfer coefficients for liquids flowing in horizontal tubes, nomograph for (Nov.) 70

Calculation of double-pipe heat exchangers (HTS) 41

Carbon black (June) 11

Cassiterite, activation of, for concentration by froth flotation (April) 63

Catalysts, inactivation of ammonia (May) 5

Cement and sulphuric acid from gypsum (Aug.) 55

Centrifugal pump installations for viscous and non-Newtonian fluids, design of (July) 66

Centrifuges:

baffle-ring, for dewatering plastic pellets (Nov.) 53

cyclic, filtration theory in (Nov.) 49

developments at Filtech/71 (Nov.) 67

for continuous fractionation of edible fats (Dec.) 52

multistage, push-type (Nov.) 65

pneumatic control system for (July) 80

Chilling, vacuum (Feb.) 49

Chloride route, TiO₂, by (Jan.) 5

Chromatography, separation by continuous (Jan.) 64

Closure joints, flangeless, for pressure vessels (Nov.) 73

Coal:

as a refinery feedstock (Nov.) 5

future source of 'synthetic' fuels (May) 3

gasification (Jan.) 11

Coke, grinding in rod mills (Jan.) 45

Compressors from Scandinavia (Dec.) 55

Computer:

boiler control by mass flow (Oct.) 57

heat exchanger design by (Oct.) 61

isometric pipework drawing by (Sept.) 53

process system (Oct.) 65

software sales (Oct.) 5

Continuous:

chromatography, separation by (Jan.) 64

iron and steelmaking (Dec.) 3

Contracting deal, transatlantic (Sept.) 5

Contractors, UK, in Europe (Jan.) 5

Control:

system, pneumatic, for centrifuges (July) 80

valves, low-noise, high-energy (June) 83

CO₂:

big jumps in UK capacity (July) 3

low-temperature, means easy transport (May) 7

Copper refining (May) 11

Corrosion:

in phosphoric acid plants (July) 5

of stainless steels in seawater (Dec.) 47

of steam turbine blades (Aug.) 45

CPE in Europe (April) 3

Cryogenic:

liquids, protecting with ball blankets (Feb.) 54

plant, construction (Feb.) 53

plant, safety in (Feb.) 65

plant, thermal insulation of (Feb.) 43

valve design (Feb.) 45

Crystallisation, solvent, new aspects of (July) 71

Cyclic centrifuges, filtration theory in (Nov.) 47

DESALINATION, freeze (June) 91

Design:

of ammonia-storage pressure spheres (Feb.) 39

of centrifugal pump installations for viscous and non-Newtonian fluids (July) 66

Desulphurisation by ZnO (June) 5

Dewatering plastic pellets, use of baffle-ring centrifuges for (Nov.) 53

Digital control:

direct, on a DMT plant (Oct.) 68

of weighing machines (Oct.) 73

Direct contact, liquid/liquid heat transfer (HTS) 29

Direct digital control on a DMT plant (Oct.) 68

Disc contactor, rotating sieve, mass transfer in (May) 67

Distillation, batch, optimum reflux policies for (May) 47

DMT plant, direct digital control on a (Oct.) 68

Double-pipe heat exchangers, calculation of (HTS) 41

Dough-moulding compounds (May) 11

Dryer, scraped-surface thin-film (Mar.) 51

Drying equipment, new (Mar.) 45

Du Pont's 1970 results (April) 5

Dynamic network planning technique (Oct.) 79

ECONOMICS of electric surface heating (HTS) 46

Edible fats, use of centrifuges for continuous fractionation of (Dec.) 52

Effect of transport costs on optimum plant size (Dec.) 63

Effects of nutrient accumulation on heat exchanger fouling (Dec.) 60

Effluent treatment by electrolysis (June) 5

Effluent/water treatment in printed-circuit production (June) 57

Electric surface heating, economics of (HTS) 46

Electrolysis, effluent treatment by (June) 5

Electron beam and laser welding (July) 5

Equipment reviews:

drying (Mar.) 45

grinding (Jan.) 39

materials handling (April) 54

pollution control (June) 65

Ethylene network in Europe (May) 5

European:

contracting profile (Sept.) 5

ethylene network (May) 5

Exergy of vapour/gas mixtures (Mar.) 52

Explosive welding, tube-to-tubeplate joints by (Jan.) 52

FATS, edible, use of centrifuges for continuous fractionation of (Dec.) 52

Fatty oil refining process (May) 51

Feedstocks:

coal as a refinery (Nov.) 5

heavy fuel oil as ammonia plant (Nov.) 59

Fe-Ni-Cr alloys for nitric acid plant (April) 51

Fermentation process, Swedish (April) 5

Fertiliser:

granulation control (Jan.) 7

granulation made simple (Sept.) 5

Film coefficient of heat transfer, nomogram for (HTS) 36

Filtech/71, centrifuge developments at (Nov.) 69

Filter, reverse-jet fabric, improving the (July) 77

Filtration theory in cyclic centrifuges (Nov.) 47

Flangeless closure joints for pressure vessels (Nov.) 73

Freeze desalination (June) 91

Froth flotation, activation of cassiterite for concentration by (April) 63

Fuel oil:

heavy, as ammonia plant feedstock (Nov.) 59

prices (May) 7

Fuels for steam raising (April) 7

Furan chemistry, reduction processes in (Aug.) 39

Furnace, open-flame, design of (Sept.) 79

GASIFICATION of coal (Jan.) 11

Granulation, control of fertiliser (Jan.) 7

Graphite heat exchangers (HTS) 38

Grinding:

coke in rod mills (Jan.) 45

mill, triple-action (Jan.) 50

new equipment (Jan.) 39

Gypsum, sulphuric acid and cement from (Aug.) 55

HEAT exchangers:

calculation of double-pipe (HTS) 41

design by computer (Oct.) 61

fouling, effects of nutrient accumulation on (Dec.) 60

graphite (HTS) 38

new industrial (HTS) 22

twisted-tape inserts in (HTS) 46

Heat transfer:

and 'static-mixing' (July) 57

coefficients for liquids flowing in horizontal tubes, nomograph for (Nov.) 70

direct-contact, liquid/liquid (HTS) 29

nomograph for the film coefficient of (HTS) 36

progress in, review of 1970 literature (HTS) 17

Heavy fuel oil as ammonia plant feedstock (Nov.) 59

Heavy residues, hydrogen from (Oct.) 49

High-energy, low-noise control valves (June) 83

High-severity gas oil cracking (Aug.) 7

Horizontal ammonia converter (Nov.) 5

Hydrodynamics of liquid/liquid spray columns

Part 2 (Jan.) 57

Hydrogen:

from heavy residues (Oct.) 49

purification at low temperatures (Feb.) 57

ICI:

1970 results (Oct.) 5

sell more computer software (Oct.) 5

Ilmenite beneficiation (May) 11

Incineration of non-uniform organic refinery waste (Nov.) 56

Integrated pipework design (Sept.) 67

Insulation, thermal, of cryogenic plant (Feb.) 43

Iron and steelmaking, continuous (Dec.) 3

Isometric pipework drawing by computer (Sept.) 53

JOINTS, flangeless closure, for pressure vessels (Nov.) 73

KEM-Tek 2 review (Dec.) 57

LEAD dioxide electrodes (June) 11

Liquid/liquid:

direct-contact heat transfer (HTS) 29

spray columns, hydrodynamics of

Part 2 (Jan.) 57

Liquids flowing in horizontal tubes, nomograph for calculating heat transfer coefficients for (Nov.) 70

Liquid-sulphur terminal (Oct.) 5

LNG reliquefaction costs (Aug.) 5

Low-noise, high-energy control valves (June) 83

Low temperature, hydrogen purification at (Feb.) 57

MAJOR emergencies, guide to (Jan.) 5

Manufacture and uses of active carbon (May) 61

Mass flow computer, boiler control by (Oct.) 57

Mass transfer in rotating sieve disc contactor (May) 67

Materials handling equipment, new (April) 54

McCabe-Thiele method, modified (May) 39

Methane steam reformer, optimal design of (April) 71

Mill, triple-action grinding (Jan.) 50

Mixer:

design—new developments in (July) 53

for viscous fluids (Sept.) 7

Mixing:

of solids and slurries, trends in (July) 62

'static-' and heat transfer (July) 57

Modified McCabe-Thiele method (May) 39

Monomer production, advances in (*Conference Report*) (Mar.) 75

Multistage, push-type centrifuge (Nov.) 65

NITRIC acid plant, Fe-Ni-Cr alloys for (April) 51

Nitrogen:

oxides, pollution by (June) 61

removal and helium recovery from natural gas (May) 11

Nomogram:

for calculating heat transfer coefficients for liquids flowing in horizontal tubes (Nov.) 70

for the film coefficient of heat transfer (HTS) 36

Non-Newtonian and viscous fluids, design of centrifugal pump installations for (July) 66

Non-uniform organic refinery waste, incineration of (Nov.) 56

Nutrient accumulation, effects on heat exchanger fouling (Dec.) 61

OIL:

- fatty, refining process (May) 51
- heavy fuel, as ammonia plant feedstock (Nov.) 59
- refiners prepare for anti-pollution controls (Mar.) 63
- Open-flame furnace design (Sept.) 79
- Optimal design of methane steam reformer (April) 71
- Optimum reflux policies for batch distillation (May) 47
- Organic refinery waste, incineration of non-uniform (Nov.) 56
- Osmosis, reverse, applications (June) 79

PEAT, absorption with (Oct.) 5

- Pellets, plastic, use of baffle-ring centrifuge for dewatering (Nov.) 53
- Pencil pitch, production of (Aug.) 48
- Petrochemical waste treatment (Nov.) 7
- Phosphoric acid plants, corrosion in (July) 5

Pipework:

- design of integrated (Sept.) 67
- isometric drawing of, by computer (Sept.) 53

Plant:

- depreciation allowances, present value of (April) 66
- size, optimum, effect of transport costs on (Dec.) 63

Pneumatic:

- control system for centrifuges (July) 80
- handling installations (April) 47

Pollution:

- air, from aluminium smelters (June) 49
- by nitrogen oxides (June) 61
- processes and equipment (June) 65
- Powders, sonic activation of (April) 59
- Present value of plant depreciation allowances (April) 66
- Pressure spheres, design of ammonia-storage (Feb.) 39
- Pressure vessels, flangeless closure joints for (Nov.) 73
- Process computer system (Oct.) 65
- Process Plant Association (Nov.) 3

Process plant:

- demand (Jan.) 5; (Sept.) 3
- unity (Oct.) 5
- Processing aluminium powder (June) 5
- Production of pencil pitch (Aug.) 48
- Progress in heat transfer—Review of 1970 literature (HTS) 17
- Protecting cryogenic liquids with ball blankets (Feb.) 54

- Pump, centrifugal, installations for viscous and non-Newtonian fluids, design of (July) 66
- Pumping, underflow, from thickeners (Jan.) 3
- Pumps for ammonium carbamate (May) 57
- Purification, hydrogen, at low temperatures (Feb.) 57
- Push-type, multistage centrifuge (Nov.) 65

REDUCTION processes in furan chemistry (Aug.) 39

- Refineries in Europe, influence of transportation on (Sept.) 70
- Refiners, oil, prepare for anti-pollution controls (Mar.) 63
- Refinery:

- feedstock, coal as (Nov.) 5
- waste, organic, incineration of non-uniform (Nov.) 56

- Refining process, fatty oil (May) 51
- Reflux policies, optimum, for batch distillation (May) 47

- Refuse disposal plant, automatic (June) 95
- Residual tar disposal (Mar.) 11

- Reverse-jet fabric filter, improving the (July) 77
- Reverse osmosis applications (June) 79

- Rod mills, grinding coke in (Jan.) 45
- Rotating sieve disc contactor, mass transfer in (May) 67

- Rubbers, synthetic (Process Survey) (Sept.) 57

SAFETY in cryogenic plant (Feb.) 65

- Scandinavia, compressors from (Dec.) 55
- Scraped-surface, thin-film dryer (Mar.) 51
- Separation, by continuous chromatography (Jan.) 64

- Short-term planning of company operations (Aug.) 57

- Short time for environment consultants? (June) 3
- Silicate boiler scales prove very dangerous (Aug.) 5

- Simultaneous H₂S and SO₂ absorption, sulphur production by (Oct.) 75

- Size-reduction machinery, wear measurement in (Jan.) 47

- Solids and slurries, trends in the mixing of (July) 62
- Solvent crystallisation, new aspects of (July) 71

- Sonic activation of powders (April) 59
- Specifying calcination plant (Mar.) 59

- Stainless steels, corrosion of in seawater (Dec.) 47
- 'Static mixing' and heat transfer (July) 57

Steam:

- reformer, improving reliability of (Oct.) 3
- reformer, methane, optimal design of (April) 71
- turbine blades, corrosion of (Aug.) 45
- use and storage of in the chemical industry (Sept.) 75

- Steamraising, fuels for (April) 7

- Steels, stainless, corrosion of in seawater (Dec.) 47

Sulphur:

- pelletising (Jan.) 11
- production of, by simultaneous H₂S and SO₂ absorption (Oct.) 75

- Sulphuric acid and cement from gypsum (Aug.) 55
- Swedish fermentation process (April) 5

Synthetic:

- fuels, coal as future source of (May) 3
- rubbers (Process Survey) (Sept.) 57

THERMAL insulation:

- of cryogenic plant (Feb.) 43
- suppliers (HTS) 33

- Thickeners, underflow pumping from (Jan.) 3
- Thin-film, scraped-surface dryer (Mar.) 51

- TiO₂ by the chloride route (Jan.) 5
- Transport costs, effect on optimum plant size of (Dec.) 63

- Transportation, influence of, on refineries in Europe (Sept.) 70

- Triple-action grinding mill (Jan.) 50
- Tubes, horizontal, nomograph for calculating heat transfer coefficients for liquids flowing in (Nov.) 70

- Tube-to-tubeplate joints by explosive welding (Jan.) 52

- Twisted-tape inserts in heat exchangers (HTS) 43

UK:

- contractor enters the big league (Aug.) 3
- contractors in Europe (Jan.) 5

- first big Al smelter commissioned (June) 7
- US test for ball valve fire safety (Aug.) 5

VACUUM chilling (Feb.) 49

- Valve design, cryogenic (Feb.) 45
- Valves, control, low-noise, high-energy (June) 83

- Vapour/gas mixtures, exergy of (Mar.) 52
- Viscous and non-Newtonian fluids, design of centrifugal pump installations for (July) 66

WASTE treatment, petrochemical (Nov.) 7

- Water/effluent treatment in printed-circuit production (June) 57

- Wear measurement in size-reduction machinery (Jan.) 47

Weighing:

- equipment (Dec.) 50
- machines, digital control of (Oct.) 73

- Welding, explosive, tube-to-tubeplate joints by (Jan.) 52

ZnO, desulphurisation by (June) 5
